Git: <https://github.com/Harsh-2111>

Professional Summary:

Results-driven Computer Science student with hands-on experience in full-stack development, data analysis, and cross-functional team leadership. Seeking an internship to apply strong technical, analytical, and collaborative skills to real-world projects while contributing to organizational growth.

Education:

Bachelor of Technology (B.Tech) in Computer Science SVKM's NMIMS Shirpur	2024-28	9.10 CGPA
Class XII (Science) Khyati Public School CBSE	2024	75%
Class X Shree Swaminarayan Gurukul Chala, Vapi CBSE	2022	94%

Leadership and Achievements:

- Head of Digital Marketing Team, Coding Club at NMIMS [2024-26]
Led a team of 8 members
 - Managed social media platforms
 - Coordinated club events
- Head of the Marketing Team, Annual Tech Fest AMBIORA-2026 — Led the core marketing department for AMBIORA-2026, overseeing promotional strategies, and cross-department collaboration. Led a team of 12 members.
- Smart India Hackathon 2024-Selected till Semi-Final Round among thousands of participating teams for developing an innovative software solution as well as participated in SIH 2025.
- Completed 30-Day Google Arcade Challenges, Participated in Google Organized Orion Hackathon.

Technical Skills:

Programming	C, C++, Python, Java
Frontend	HTML, CSS, JavaScript, React.js
Backend	Node.js, Express.js
Databases	MySQL, MongoDB, Oracle SQL

Tools	Google AI Studio, Canva, Figma, Stitch, Power BI
--------------	--

Soft Skills: Stakeholder Management, Strategic Planning, Public Relations.

Projects:

[1]Smart Hostel Leave Portal | *React.js, Node.js, HTML, CSS, JS* | Jun 2025 – July 2025

- Developed a Hostel Leave Management Portal enabling digital leave approvals, QR-based gate passes, and automated workflow for students and faculty using React.js and Node.js. Currently in the beta-testing phase for upcoming campus-wide deployment. Designed a responsive frontend using React.js, integrated backend APIs, and managed local deployment using XAMPP

[2]Smart Industry Machine Monitoring System | *C++, Blynk, Cisco* | Jan 2026 – March 2026

- Designed an IoT-based machine monitoring system using hardware sensors and actuators to track real-time industrial telemetry. Configured automated logic handlers for critical temperature and pressure thresholds, visualizing live data streams via a centralized Blynk dashboard.

[3]Smart Dashboard for Uber | *POWER BI* | Jun 2025 – Dec 2025

- A smart dashboard developed using Power BI, analyzing yearly Uber trip records and applying the insights for predictive analysis.

[4]RAG-Based Industrial AI Monitoring System | *Python, RAG (LangChain), NVIDIA API, OpenCV, FastAPI* | Jun 2026 – Ongoing

- Building an Industrial AI Monitoring System where users upload images for automated fault detection using a Retrieval-Augmented Generation (RAG) pipeline. Integrated NVIDIA API keys for image classification, first validating whether an uploaded image was industrial in nature and then diagnosing the specific fault, generating clear, actionable reports for end users.

[5]IDBI Unnati App | *React.js, Node.js, HTML, CSS, JS, MongoDB* | Aug 2026

- Designed and developed a full-stack banking application for the IDBI Bank Unnati Hackathon, building a responsive React.js frontend and a Node.js backend with MongoDB integration. Implemented key user workflows and interfaces aligned with the hackathon's problem statement, from ideation to a working prototype.

Internship:

- **Full Stack Developer** @ CodSoft | May-June(2026)

Developed responsive web applications using React and Node. Worked on frontend-backend integration. Improved debugging and deployment workflow.

Interests:

- Technical Event Management
- Competitive Programming
- UI/UX Design
